

## → Your Partner for Oil & Gas fluid automation

Under the BC PREMIUM label, the SQX and STX ranges of quarter-turn & multi-turn explosionproof actuators are reliable and certified electric actuation solutions inspired by customers' requirements and return on experience. In this specific market we offer a global-local business organization in order to deliver customised solutions to local customers within a good response time.

By delivering the most suitable solutions, we have been building success stories all around the world.

## → Tailor made solutions for Oil and Gas processes

Under the STX and SQX ranges of explosionproof actuators, many options are available for enhanced security & reliability, such as SIL Certification, or for increased user-friendliness, compatibility with main fieldbus protocols (Profibus DP, Modbus, Foundation Fieldbus, HART and others on demand).

More information about BERNARD CONTROLS electric actuation solutions for Oil & Gas applications in our Oil & Gas catalogue and SQX & STX INTELLI+® catalogue.

## → For the Oil & Gas market, Bernard Controls at your service

Welcome to the new edition of the famous Abu Dhabi International Petroleum Exhibition and Conference. We look forward to meeting you again there to discuss new opportunities, share knowledge and expectations.

Our presence for more than 75 years in the electric actuator market has deeply influenced our expertise and commitment to offer competitive tailor-made solutions. As we believe that a serene and trusting environment where the customer feels

completely accompanied is key to guarantee full customer satisfaction, our promise «smart solutions always by our side» stresses the good combination of appropriate technology and dedicated customer support. Indeed, our teams offer to accompany you not only during your purchase decision but also during the whole product life cycle. Discover on the middle pages of this leaflet, how BERNARD CONTROLS delivers on-site services to all its customers whatever market or location.

Be present at each stage of your process is the way you can experience what we call «Strong Customer Support every day». This partnership approach is our response to the challenges occurring in the Oil & Gas sector. And our BC Premium Label keeps on guaranteeing fully reliable product solutions. Turn the pages and learn more about our success stories with the explosionproof SQX and STX ranges. Let's discover what we can do for you and much more...

Strong Customer Support for the Oil & Gas industry

# → Your partner on site

Whatever your market and your application, commissioning electric actuators requires specific and careful expertise. That is the reason why our specialists are available to provide the adequate support to our customers. Thanks to a wide international presence, our technicians are available

everyday to quickly go on site. Caring about your needs and constraints and relying on decades of experience our teams can perform on site surveys, troubleshooting, installation and commissioning, repair of damaged or deteriorating assets, as well as retrofitting and upgrading of site such as:

- > Upgrading of manual valves to become an MOV (Motor Operated Valve),
- > Upgrading of electric actuator control systems to provide additional plant optimisation,

- > Upgrading of existing electric actuators,
- > Upgrading of existing electric actuators to provide additional monitoring for AMS (Asset Management Systems).

## Global partner, always by your side

### Global presence, local support

Reliability, availability and responsiveness are the key patterns that turn sales contacts into close trusting relationships. BERNARD CONTROLS global Group organization aims at building up this kind of relationships, thus enhancing customer service and satisfaction.

New processes combined with this organization enable improved response time and appropriate technical & commercial solutions to market needs.

While our global presence is the guarantee of a strong customer support everywhere on earth, especially for global projects, the creation of Operating Areas with Operating Units proves to be the relevant response to local market needs.

BERNARD CONTROLS is structured in 4 Operating Areas focused on local customers' needs thanks to Operating Units in direct contact with clients everywhere on the globe.
