

The complete solution

The BC PREMIUM label guarantees "The complete solution", with many options and possible configurations to fit at best very specific needs.

Decades of return on experience from very demanding applications such as nuclear qualified valves actuation have shaped our technical orientations and our commitment to quality and safety.

The BC PREMIUM label reflects this long-lasting experience and in-depth expertise, working with the most demanding markets, where the ability to design customized solutions has always been decisive. It is the guarantee of quality and security for installations' actuation in the case of **severe environment, demanding operational constraints and critical applications.**

The complete solution

for quarter-turn weatherproof electric actuation

SQ SWITCH

SQ INTELLI+®

Product overview

Travel limit switches

Laptop with Intellisoft

Handwheel

User-friendly local commands

- > Through 2 buttons
- > Can be inhibited remotely

Large LCD display

- > For user-friendly commissioning and local commands
- > Clear status, no abbreviations

Separated control box

Double-sealing principle

Product specifications

- 45 to 10,000 Nm (up to 800 Nm direct mount) & up to 1,00,000 Nm on request
- Connector : Double-sealing with INTELLI+®
- Type of Controls :
 - > Electromechanical SWITCH
 - > Integrated INTEGRAL
 - > Integrated INTELLI+® (v2)
- BC Duty & Modulating Classification :
 - > On-Off: Class A+
 - > Inching/Positioning: Class B+
 - > Modulating: Class III
- Environment :
 - > IP 68 / C3 up to C5-M
 - > T: -20°C...+70°C (option low T: -40°C on all models and option high T* +90°C for SWITCH versions only)

*All electrical features and specifications on this brochure refer to INTELLI+(R) version

Product benefits

SECURITY AT ALL LEVELS

- **Actuator & valve protection**
 - > Weatherproof and corrosion resistant design
 - > Thanks to ABSOLUTE SENSORS, which constantly measure the position & torque of your valve INTELLI+ gets precise and reliable information.
 - > **INTELLI+ Phase monitoring** (automatic phase correction device)
 - > **Protection of change in direction**
 - > **Signaling continuity** (option)
 - > **SIL Certification** (option)
 - > **Double-sealing protection**
 - > **Motor thermal protection**
 - > **Trouble-free operation**

• Protection of your installation

- > **Partial Stroking** to check the availability of the connected MOVs. Starting position as well as partial stroke amplitude are programmable.
- > **Fieldbus lighting protection**
- > **Fault monitoring relay**
- > **Protection by password**
- > **Alarms indication** : INTELLI+® continuously monitors the actuator performances. Up to 17 different types of faults and alarm scan be reported.
- > **Emergency shutdown (ESD)** : Depending upon the valve operation, ESD can be configured as an Open, Close or Stop command.
- > **Programmable Timer** : to increase in operating time of the actuator, to avoid water-hammer effect in a pipe.

EASY SITE MANAGEMENT

• During the actuator on valve setting procedure, the user is guided step by step by INTELLI+®

- > Choice of closing (on torque or on position)
- > Choice of direction to close
- > Drive the actuator to the closed and the open position and validate the position
- > The setting can be done automatically or manually by choosing the closed or open positions.

• Diagnostic & preventative maintenance

Thanks to its absolute sensors and its microprocessor technology, INTELLI+® continuously monitors its components as well as the actuator status and measures some important valve parameters. INTELLI+® provides users with a great deal of information to help with system diagnostic and aid in scheduling their valves preventative maintenance. INTELLI+® helps maximise process availability by reducing maintenance downtime.

• Actuator activity

Parameters are available on the display through the menu to check the activity of the actuator (Number of starts, Running time, Handwheel action,...)

• Separated control box (option)

• Dec clutch-free handwheel with electric command priority

• Bus continuity

BERNARD CONTROLS actuators can host a special Profibus connexion board which ensures continuity of signal throughout the line even when the actuator is removed from the field.
