

A new milestone in BERNARD CONTROLS worldwide organization

Always by your side is a commitment of BERNARD CONTROLS to be available to accompany customers in all their projects throughout the globe. This promise is made possible thanks to a global-local Group organization implemented since 2014 and which now reached its final stage with the creation of a new Operating Area ‘India, Middle-East, Africa’.

This evolution results from BC development in the Middle-East region driven by our Dubai Operating Unit BERNARD CONTROLS Middle-East. The local team there brings a responsive local support to key Oil & Gas projects especially, in collaboration with all other Operating Units involved in this global business, and with the dedicated support of a Vice President Oil & Gas. Then, in this area, a new entity has also been recently established in Ivory Coast – BERNARD CONTROLS Africa – to boost the existing business of our local agents & distributors and develop a qualitative local support.

Furthermore, the former ‘North America Operating Area’ now turns into ‘Americas Operating Area’ and includes the whole American continent, from Canada to South America. A new manufacturing unit is under process there in order to be able to deliver customized solutions to local customers within a good response time. This is definitely the first step of a local production strategy.

Thus, in a Group organization focused on customer support and satisfaction, you can rely on BERNARD CONTROLS expertise whatever your location; each of our four Operating Areas gathering local sales teams, local R&D and progressively, local manufacturing facilities.

About BERNARD CONTROLS

BERNARD CONTROLS designs & manufactures electric actuators and control systems for industrial valves’ automation. Global leader in the nuclear market, BERNARD CONTROLS is one of the main actors in the global actuation business.

BERNARD CONTROLS relies on a strong international network based on 16 Operating Units in Americas, Asia, Europe and India / Middle- East / Africa; as well as more than 50 distributors throughout the world.
